For the first use of Ncstudio, you can click the following link to see the details for how to set it up, and, if you want, install it on your own computer. Additionally, you can click this link and follow the steps to install NC Studio on your own machine. I've tried installing the English version of NC Studio on a 64-bit machine, and it was successful. I couldn't find a way to only update the software - it seems to update both the desktop interface and the developer tools. This is what I did: Clicked the link to download the English version from the main website, by the way. Opened the ncstudio-v5.4.53-english-setup.rar file with 7-zip to decompress it. Opened the Ncstudio_Setup_v5.4.53_en.exe with 7-zip to decompress it. Clicked the Administrator node in the right pane and ran the install. Initially, it failed with the message "Your Machine Is Not Suitable for the English Release". I clicked OK, got the message "The English language pack update is not compatible with your Computer Hardware." I clicked OK again, then got the message "This update is only compatible with Windows 7 and Windows 8.1, and can not be used on Windows 10". I clicked OK again, got the message "This update is only compatible f678ea9f9e
